Great Lakes Seminars reserves the right to cancel the course due to unforeseen/unavoidable circumstances. In the event of a cancellation, Great Lakes Seminars will not be responsible for any charges incurred by the registrant other than the course cost.

## Instructor

### Jason Hepworth PT, DPT, CIMT, CIDN

Jason holds a bachelor's degree in Health and Fitness in Preventative and Rehabilitative Programs from Central Michigan University. He also holds a doctorate in physical therapy from Grand Valley State University and is a Certified Integrated Manual Therapist (CIMT) through Great Lakes Seminars. Jason's approach to therapy encompasses the use of joint and soft tissue mobilization, functional therapeutic exercise and patient education to return his patients to their highest functional level. Jason is always looking for opportunities to learn new things and improve himself as a clinician. Jason, his wife, and two children live in Southeast Michigan.

## 2026 Course Schedule

- April 11, 2026 - 9:00 am-12:00pm ET
- October 17, 2026 - 9:00 am-12:00pm ET

Please check our website for the most updated schedule: [www.glseminars.com](http://www.glseminars.com)

# Differentiating Knee Pain: Ankle and Foot vs Knee vs Hip

## 2026

**We Don't Just Teach. We Inspire.**

**75% Hands-On Training**  
Practice new techniques  
with confidence

**Passionate Instructors**  
Learn from specialized  
instructors who truly care

**The GLS Experience**  
Be part of a fun weekend  
that will fly by

# Differentiating Knee Pain: Ankle and Foot vs Knee vs Hip

## Course Description

Knee pain is often multifactorial and can originate from the knee itself—or from dysfunctions in the hip, ankle, or foot. This webinar is designed to provide clinicians with a thorough, evidence-based approach to accurately identifying the source of knee pain and improving diagnostic precision. Divided into five comprehensive sections, the webinar guides participants through deciphering mechanical vs non-mechanical conditions from the subjective exam, understanding pain referral patterns that mimic knee pathology, and performing a full orthopedic evaluation of the hip, knee, and foot.

Participants will also gain confidence in using evidence-based screening tools and special tests to effectively rule in or rule out contributing joints, followed by guidance on interpreting exam findings and applying clinical reasoning. By the end of the webinar, therapists will have practical tools to enhance their differential diagnosis process and deliver more targeted, effective treatment for patients with lower extremity dysfunction.

## Continuing Education

This course has been submitted for 3 continuing education hours in the state in which each course is held. Approval amounts may vary per state. Certificates of attendance with the number of course hours will be given to each participant at the completion of the course.

## Course Outline:

**Section 1 – Deciphering Between Mechanical/Non-Mechanical Conditions Obtained in Subjective Exam/History (20 minutes)**

**Section 2 – Pain Referral Patterns of the Knee (20 minutes)**

**Section 3 – Performing and Interpreting the Knee/Hip/Foot Examination (60 minutes)**

**Section 4 – Using Evidence-based Screening and Special Testing to Determine Proper/Correct Differential Diagnoses of Knee Pathology vs Hip or Other Pathology (60 minutes)**

**Section 5 – Putting it All Together in Order to Understand Examination Results (20 minutes)**

## Course Objectives

- State 3 “red flags” or visceral symptoms that can present with a knee pathology.
- Utilize 4 diagnostic steps to improve clinical decision making.
- Describe 3 ways how muscle testing and neurological screening during the knee, hip, ankle/foot exam can help with differential diagnosis.
- Describe 3 traumatic and 3 non-traumatic causes of knee pain.
- Describe 3 screenings and/or special tests that can be used for the knee, hip, ankle/foot.
