# Vestibular Rehabilitation: BPPV, Vestibular Hypofunction and Beyond

## Course Description

Dizziness and vertigo can significantly impact a patient's function and quality of life—and vestibular rehabilitation plays a vital role in helping them return to stability and confidence. This live webinar provides a comprehensive overview of vestibular rehab, helping clinicians better understand the underlying anatomy and improve assessment and treatment strategies for common vestibular disorders.

Structured into four focused sections, the webinar covers the anatomy of the vestibular system, evaluation and treatment of benign paroxysmal positional vertigo (BPPV), vestibular hypofunction, and other causes of dizziness and vertigo. Participants will gain the tools and clinical insight needed to accurately assess, differentiate, and treat a wide range of vestibular conditions. By the end of the webinar, therapists will feel more confident and prepared to improve outcomes for patients struggling with balance and vestibular dysfunction.

## Continuing Education

This course has been submitted for 3 continuing education hours in the state in which each course is held. Approval amounts may vary per state. Certificates of attendance with the number of course hours will be given to each participant at the completion of the course.

## Course Outline:

**Section 1 – Basics of Vestibular System Anatomy (30 minutes)**

**Section 2 – BPPV (60 minutes)**

**Section 3 – Vestibular Hypofunction (60 minutes)**

**Section 4 – Other factors common in Vestibular Rehab (30 minutes)**

## Course Objectives

- Participant will be able to accurately state 3 of the clinically relevant structures of the vestibular system.
- Participant will be able to accurately demonstrate 3 skills for BPPV positional testing and treatment.
- Participant will be able to accurately demonstrate 3 skills to perform and interpret results of the oculomotor exam.
- Participant will be able to accurately state 3 of the possible causes of vestibular hypofunction and appropriate treatments.
- Participant will be able to accurately describe the importance of the VOR in treating patients with vestibular hypofunction.
- Participant will be able to accurately describe the common vestibular treatment theories of habituation, adaptation, and substitution.
- Participant will be able to accurately state 3 factors that may impede full resolution of vestibular symptoms.
